

DataLens — Data Analysis Report

Dataset: student_test.csv | Type: CSV | Analysis Date: October 03, 2026 • 11:35 AM

72	10	3	2	6 Numeric
Total Records	Total Columns	Missing Values	Duplicate Rows	Numerical Fields

Key Insights

- **Dataset Dimensions:** Contains **72** total records across **10** attributes.
- **Age:** Averages **20.49** (median: 20.00), ranging from 19.00 to 22.00.
- **Attendance:** Averages **81.96** (median: 85.00), ranging from 58.00 to 96.00.
- **Missing Values:** Found **3** unpopulated cells requiring review.
- **Duplicates:** Detected **2** duplicate rows (2.8% of total).

Dataset Preview

Showing a sample of the uploaded dataset.

Name	Age	Gender	Department	Attendance	Math	Physics
Aarav Sharma	20	Male	Computer Science	88.0	85	78
Diya Patel	21	Female	Information Techno	92.0	90	88
Rohan Verma	19	Male	Computer Science	74.0	62	58
Ananya Iyer	20	Female	Electronics	95.0	94	91
Vivaan Reddy	22	Male	Mechanical	65.0	55	60

Statistical Summary

Feature	Mean	Median	Min	Max
Age	20.49	20.00	19.00	22.00
Attendance	81.96	85.00	58.00	96.00
Math	76.38	80.00	45.00	98.00
Physics	76.06	79.00	50.00	95.00
Programming	79.76	85.00	48.00	99.00
Study_Hours	5.84	6.00	2.50	9.00

Visual Analysis & Patterns

Category Breakdown: Gender

Observation: The most frequent category is "Male" with 36 recorded occurrences.

Distribution: Age

Observation: Values center around an average of 20.49 (median: 20.00).

Attendance vs Math

Observation: The chart shows a positive association ($r = 0.99$) between Attendance and Math in this sample.

Feature Correlation Heatmap

Observation: Highlights linear associations; darker blue indicates higher positive correlation.

Data Quality Audit

Missing Values: 3 | Duplicate Rows: 2 | Columns Audited: 10

Column	Type	Missing Cells	Missing %	Status
Attendance	float64	2	2.78%	Warning
Programming	float64	1	1.39%	Warning

Analytical & AI Insights

- Key observations from dataset summary:

- Sample distribution is balanced.
- Key variables recorded accurately.

Limitations

- Findings describe the uploaded sample records and may not generalize to broader unobserved populations.
- Observed correlations indicate mathematical associations only and do not establish causal relationships.
- Domain-specific context and verification should always guide downstream operational decisions.

Conclusion

DataLens successfully analyzed 72 records across 10 variables in 'student_test.csv'. Data quality shows 3 missing values and 2 duplicate rows. The visual and statistical summary provides an objective baseline for academic exploration and reporting.
