

DataLens — Data Analysis Report

Dataset: duplicates_test.csv | Type: CSV | Analysis Date: October 02, 2026 • 05:41 PM

40	8	0	10	4 Numeric
Total Records	Total Columns	Missing Values	Duplicate Rows	Numerical Fields

Key Insights

- **Dataset Dimensions:** Contains **40** total records across **8** attributes.
- **Quantity:** Averages **2.55** (median: 2.00), ranging from 1.00 to 10.00.
- **Price:** Averages **52.60** (median: 37.50), ranging from 4.50 to 180.00.
- **Completeness:** No missing values detected across any column (100% complete records).
- **Duplicates:** Detected **10** duplicate rows (25.0% of total).

Showing a sample of the uploaded dataset.

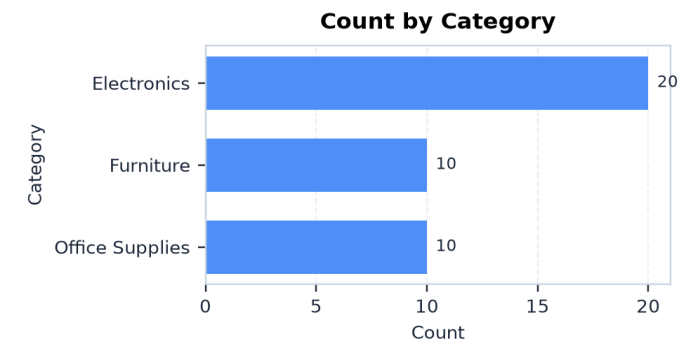

Date	Product	Category	Quantity	Price	Region	Sales
2026-01-05	Wireless Mouse	Electronics	2	25.0	North	50.0
2026-01-07	Mechanical Keyboard	Electronics	1	85.0	West	85.0
2026-01-10	Desk Chair	Furniture	1	150.0	South	150.0
2026-01-12	Monitor Stand	Office Supplies	3	30.0	East	90.0
2026-01-15	USB-C Hub	Electronics	2	45.0	North	90.0

Statistical Summary

Feature	Mean	Median	Min	Max
Quantity	2.55	2.00	1.00	10.00
Price	52.60	37.50	4.50	180.00
Sales	80.53	75.00	25.00	180.00

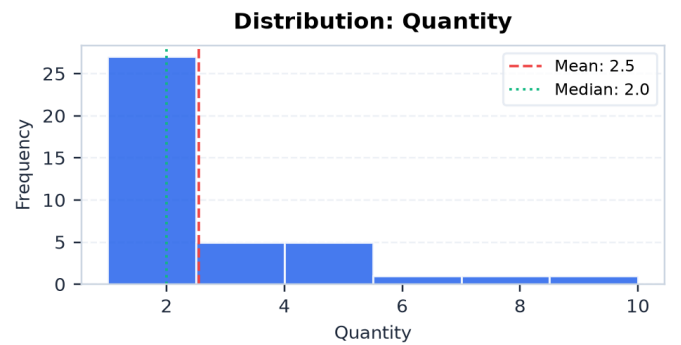

Visual Analysis & Patterns

Category Breakdown: Category

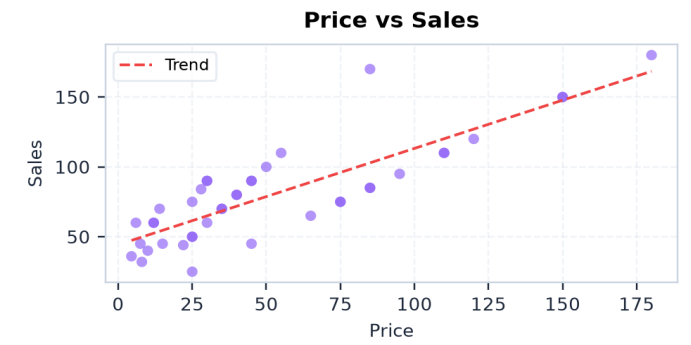

Observation: The most frequent category is "Electronics" with 20 recorded occurrences.

Distribution: Quantity

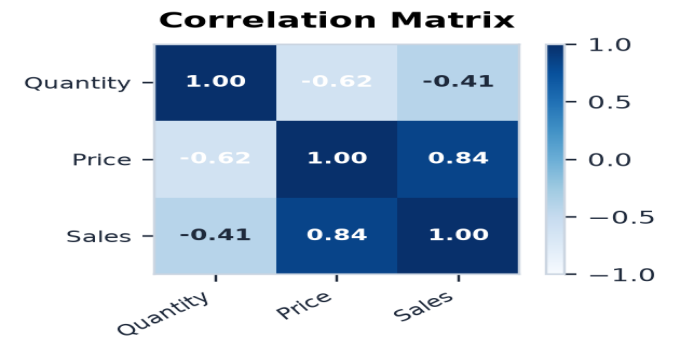

Observation: Values center around an average of 2.55 (median: 2.00).

Price vs Sales

Observation: The chart shows a positive association ($r = 0.84$) between Price and Sales in this sample.

Feature Correlation Heatmap

Observation: Highlights linear associations; darker blue indicates higher positive correlation.

Data Quality Audit

Missing Values: 0 | Duplicate Rows: 10 | Columns Audited: 8

• **Clean Record Quality:** All attributes are 100% complete with 0 missing values.

Analytical & AI Insights

- Key observations from dataset summary:
- Sample distribution is balanced.
- Key variables recorded accurately.

Limitations

- Findings describe the uploaded sample records and may not generalize to broader unobserved populations.

- Observed correlations indicate mathematical associations only and do not establish causal relationships.
- Domain-specific context and verification should always guide downstream operational decisions.

Conclusion

DataLens successfully analyzed 40 records across 8 variables in 'duplicates_test.csv'. Data quality shows 0 missing values and 10 duplicate rows. The visual and statistical summary provides an objective baseline for academic exploration and reporting.
