

DataLens — Data Analysis Report

Dataset: employee_test.csv | Type: CSV | Analysis Date: October 02, 2026 • 05:41 PM

15	8	0	0	3 Numeric
Total Records	Total Columns	Missing Values	Duplicate Rows	Numerical Fields

Key Insights

- **Dataset Dimensions:** Contains **15** total records across **8** attributes.
- **Years_Experience:** Averages **4.60** (median: 4.00), ranging from 2.00 to 9.00.
- **Salary:** Averages **76,533.33** (median: 74,000.00), ranging from 52,000.00 to 115,000.00.
- **Completeness:** No missing values detected across any column (100% complete records).
- **Cleanliness:** Zero duplicate rows detected in this sample.

Showing a sample of the uploaded dataset.

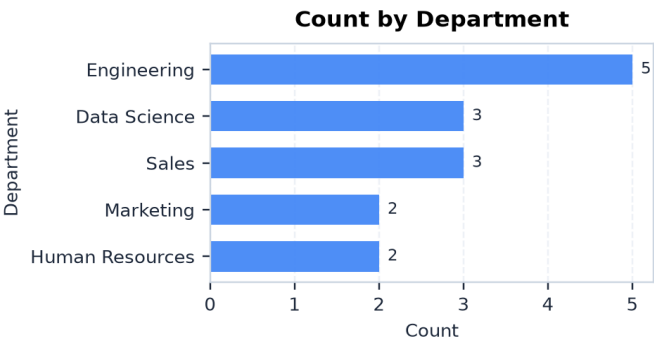

Department	Years_Experience	Salary	Performance_Rating	Remote_Work
Engineering	6	92000	4.5	Yes
Marketing	4	65000	4.2	No
Data Science	3	72000	4.6	Yes
Engineering	2	60000	3.8	Yes
Sales	5	78000	4.1	No

Statistical Summary

Feature	Mean	Median	Min	Max
Years_Experience	4.60	4.00	2.00	9.00
Salary	76,533.33	74,000.00	52,000.00	115,000.00
Performance_Rating	4.27	4.20	3.80	4.90

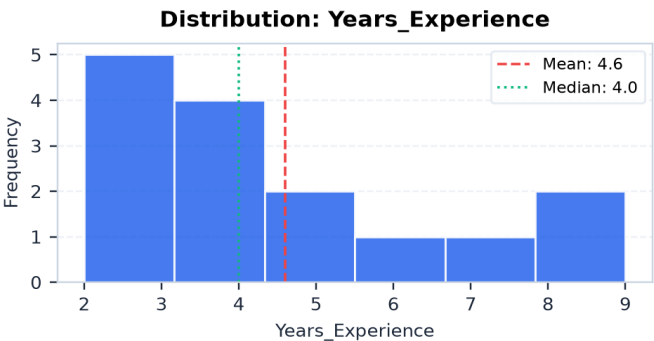

Visual Analysis & Patterns

Category Breakdown: Department

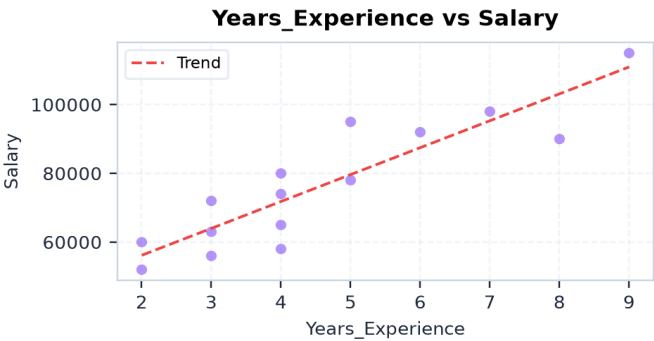

Observation: The most frequent category is "Engineering" with 5 recorded occurrences.

Distribution: Years_Experience

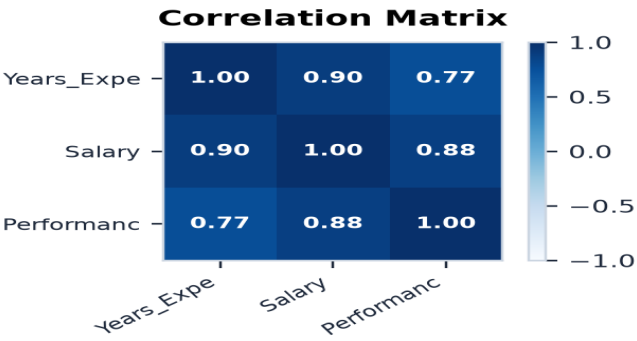

Observation: Values center around an average of 4.60 (median: 4.00).

Years_Experience vs Salary

Observation: The chart shows a positive association ($r = 0.90$) between Years_Experience and Salary in this sample.

Feature Correlation Heatmap

Observation: Highlights linear associations; darker blue indicates higher positive correlation.

Data Quality Audit

Missing Values: 0 | Duplicate Rows: 0 | Columns Audited: 8

- **Clean Record Quality:** All attributes are 100% complete with 0 missing values.

Analytical & AI Insights

- Key observations from dataset summary:
- Sample distribution is balanced.
- Key variables recorded accurately.

Limitations

- Findings describe the uploaded sample records and may not generalize to broader unobserved populations.

- Observed correlations indicate mathematical associations only and do not establish causal relationships.
- Domain-specific context and verification should always guide downstream operational decisions.

Conclusion

DataLens successfully analyzed 15 records across 8 variables in 'employee_test.csv'. Data quality shows 0 missing values and 0 duplicate rows. The visual and statistical summary provides an objective baseline for academic exploration and reporting.
